+91 7368868707 | [Github](#)

Detail-oriented Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, and programming. Experienced in Python-based projects and data-driven problem solving. Demonstrates a keen interest in Artificial Intelligence and Machine Learning, with hands-on exposure to predictive modeling and Generative AI applications. Seeking a research internship to contribute to innovative AI/ML solutions and advance analytical capabilities.

EXPERIENCE

FRONTEND DEVELOPER INTERN – CODEXINTERN

JUNE 2025 – JULY 2025

Developed responsive UI components using HTML and CSS
Enhanced user experience through improved design and layout optimization
Collaborated on frontend tasks in a development environment

GENERATIVE AI INTERN – PRODIGY INFOTECH

JUNE 2025 – JULY 2025

Worked on AI-driven content generation tasks using modern tools
Explored real-world applications of Generative AI and prompt engineering
Gained exposure to AI workflows and practical implementation strategies

TECHNICAL SKILLS

Programming: C, C++, Java, Python

AI/ML & Data: Data Analysis, Basic Machine Learning, Prediction

Core CS: Data Structures & Algorithms, DBMS (SQL)

Tools & Technologies: Linux, Git, GitHub, VS Code

Web: HTML, CSS

EDUCATION

ARYA COLLEGE OF ENGINEERING, JAIPUR

B.Tech in Computer Science Engineering

AUGUST 2024 – 2028

- CGPA – 7.94
-

KEY ACHIEVEMENTS

- Built multiple real-world projects demonstrating problem-solving and development skills
 - Active GitHub contributor with consistent project uploads
 - Strong foundation in algorithmic thinking and coding practices
-

PROJECTS

File Management System (Python) [Link](#)

- Designed and implemented a file management system supporting CRUD operations (Create, Read, Update, Delete)
- Applied structured programming and file handling techniques
- Improved system-level understanding and algorithmic efficiency
-

Blinkit Store Placement Prediction (Machine Learning Project) [Link](#)

- Developed a predictive model to analyze factors influencing store placement decisions
- Performed data preprocessing, feature selection, and exploratory data analysis (EDA)
- Applied basic machine learning techniques to generate insights and predictions
-

Snake-Water-Gun Game (Python) [Link](#)

- Built a command-line game using Python with randomized logic
 - Implemented conditional decision-making and user interaction
 - Strengthened core programming and problem-solving skills
-

RELEVANT COURSEWORK

1. Data Structures & Algorithms
 2. Database Management Systems
 3. Operating Systems (Basics)
 4. Introduction to Machine Learning
-

KEY ACHIEVEMENTS

Artificial Intelligence, Machine Learning, Data Analysis, Predictive Modeling, Python Programming, Data Structures, Algorithms, SQL, Git, Linux, Problem Solving, Generative AI, Feature Engineering, EDA
